- Stay away from people who are smoking.
- If you smoke, smoke outside.

DUST

- Vacuum weekly with a vacuum with a high efficiency filter or a central vacuum. Try to make sure people with asthma are not home during vacuuming.
- Remove carpet if possible. Wet carpet before removing and then dry floor completely.

- Reduce clutter and remove stuffed animals, especially around the bed.
- Replace heating system filters regularly.

PESTS

- Do not leave food or garbage out. Store food in airtight containers.
- Try using traps and poison baits, such as boric acid for cockroaches. Instead of sprays/bombs, use baits placed away from children, such as behind refrigerator.
- Vacuum up cockroach bodies and fill holes in with caulking or copper wool.
- Fix leaky plumbing, roof, and other sources of water.

MOLD

- Use exhaust fans or open windows for cross ventilation when showering or cooking.
- Clean mold off hard surfaces with detergent in hot water and scrub with stiff brush or cleaning pad, then rinse clean with water. Absorbent materials with mold may need to be replaced.
- Make sure people with asthma are not in the room when cleaning.
- Fix leaky plumbing or other sources of water or moisture.

- Keep pets out of the bedroom of the person with asthma.

- On very bad pollution days, stay indoors with windows closed.

EXERCISE

- Warm up before exercising.
