

Health Care Provider's Allergy and Intolerance Form

Name of Child

Child's Date of Birth

The above child attends our child care program and we have been 'informed' that they are allergic or intolerant to the following items:

1.	4.
2.	5.
3.	6.

As a licensed child care program, we are required to meet state licensing standards. Please complete the Allergy and Intolerance Statement, Child Care Emergency Plan for Allergic Reactions, and if necessary, the Allergy Medication Authorization Form. **We need to know which items the child is allergic or intolerant to, the steps to take to treat an allergic reaction, and appropriate substitute foods to assure that the child's nutrition is not compromised.**

Please return completed packet to the Child Care site listed below:

Sincerely,

Sheryl Nelson

Child Care Program Director

Staff Training Record*

Staff Name	Trainer (Parent/Guardian Signature)	Date

***Per WACs 110-300-0215 and 110-300-0186, an Early Learning provider must work with the child's parents or guardians to ensure the program has the necessary medication, training, and equipment to properly manage a child's food allergies. Annual staff training is NOT sufficient. Staff should receive individualized training from a parent/guardian for each child that has an allergy care plan.**

Allergy Medication Authorization Form

X This form is valid from: / / (Start Date) until / / (End Date).
(Health Care Providers: End date is a maximum of one year from your signature date **below**)

Child Care Program Staff: A **new** Allergy Care Plan should be completed and signed by the “End Date” (shown above), or sooner if there are changes to a medication or health condition. If a medication expires before the “End Date of this Authorization Form, a health care provider or parent/guardian does not need to complete a new form, but the expired medication **MUST** be replaced with one that has not expired. **Never give an expired medication.**

There are many different types of Epinephrine auto-injectors. **Always follow the instructions on the medication label, as well as any child-specific instructions from parents/guardians.**

Below are common types of epinephrine auto-injectors and how to use them. **These instructions DO NOT replace staff training by the parent/guardian.**

HOW TO USE AUVI-Q® (EPINEPHRINE INJECTION, USP), KALEO

1. Remove Auvi-Q from the outer case. Pull off red safety guard.
2. Place black end of Auvi-Q against the middle of the outer thigh.
3. Press firmly until you hear a click and hiss sound, and hold in place for 2 seconds.
4. Call 911 and get emergency medical help right away.

HOW TO USE EPIPEN®, EPIPEN JR® (EPINEPHRINE) AUTO-INJECTOR AND EPINEPHRINE INJECTION (AUTHORIZED GENERIC OF EPIPEN®), USP AUTO-INJECTOR, MYLAN AUTO-INJECTOR, MYLAN

1. Remove the EpiPen® or EpiPen Jr® Auto-Injector from the clear carrier tube.
2. Grasp the auto-injector in your fist with the orange tip (needle end) pointing downward. With your other hand, remove the blue safety release by pulling straight up.
3. Swing and push the auto-injector firmly into the middle of the outer thigh until it 'clicks'. Hold firmly in place for 3 seconds (count slowly 1, 2, 3).
4. Remove and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.

HOW TO USE IMPAX EPINEPHRINE INJECTION (AUTHORIZED GENERIC OF ADRENACLICK®), USP AUTO-INJECTOR, AMNEAL PHARMACEUTICALS

1. Remove epinephrine auto-injector from its protective carrying case.
2. Pull off both blue end caps: you will now see a red tip. Grasp the auto-injector in your fist with the red tip pointing downward.
3. Put the red tip against the middle of the outer thigh at a 90-degree angle, perpendicular to the thigh. Press down hard and hold firmly against the thigh for approximately 10 seconds.
4. Remove and massage the area for 10 seconds. Call 911 and get emergency medical help right away.

HOW TO USE TEVA'S GENERIC EPIPEN® (EPINEPHRINE INJECTION, USP) AUTO-INJECTOR, TEVA PHARMACEUTICAL INDUSTRIES

1. Quickly twist the yellow or green cap off of the auto-injector in the direction of the "twist arrow" to remove it.
2. Grasp the auto-injector in your fist with the orange tip (needle end) pointing downward. With your other hand, pull off the blue safety release.
3. Place the orange tip against the middle of the outer thigh at a right angle to the thigh.
4. Swing and push the auto-injector firmly into the middle of the outer thigh until it 'clicks'. Hold firmly in place for 3 seconds (count slowly 1, 2, 3).
5. Remove and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.

HOW TO USE SYMJEPI™ (EPINEPHRINE INJECTION, USP)

1. When ready to inject, pull off cap to expose needle. Do not put finger on top of the device.
2. Hold SYMJEPI by finger grips only and slowly insert the needle into the thigh. SYMJEPI can be injected through clothing if necessary.
3. After needle is in thigh, push the plunger all the way down until it clicks and hold for 2 seconds.
4. Remove the syringe and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.
5. Once the injection has been administered, using one hand with fingers behind the needle slide safety guard over needle.

ADMINISTRATION AND SAFETY INFORMATION FOR ALL AUTO-INJECTORS:

1. Do not put your thumb, fingers or hand over the tip of the auto-injector or inject into any body part other than mid-outer thigh. In case of accidental injection, go immediately to the nearest emergency room.
2. If administering to a young child, hold their leg firmly in place before and during injection to prevent injuries.
3. Epinephrine can be injected through clothing if needed.
4. Call 911 immediately after injection.
